

Your counter's billing, finally speaking its language.

One app for billing, kitchen tickets, and reports —
bilingual in English and Tamil, right down to the printed
bill. Runs on the phone or PC already sitting at your
counter.

WHY OWNERS SWITCH

Built around how a Tamil Nadu counter actually runs

Every feature below is live in the app today — not a roadmap promise.

 Tamil on the paper bill, not just the screen Most billing software only shows Tamil on-screen. Item names print correctly in Tamil on the customer's bill and the kitchen ticket — no garbled characters.	 Print from whatever's at the counter Bills and kitchen tickets print straight from a counter PC, a tablet, or your cashier's own Android phone — no special drivers, no dedicated hardware.	 GST shown the way customers expect CGST and SGST always print as two separate lines with Indian-style ₹ formatting — no merged "GST" line that makes a customer double-check.
 Offers apply themselves Set a festival offer or item discount once — it applies automatically at billing. No cashier math, no under- or over-discounting at the till.	 Know who's actually selling Waiter and cashier incentive tracking is built in, with a ready-made payout worksheet — no separate spreadsheet at month-end.	 Tolerant of patchy WiFi Orders save as staff enter them, so a weak signal at the till doesn't cost you a held bill or a lost ticket to the kitchen.
